

Digital Media + Learning Conference
October 5-7, 2016 at the
University of California, Irvine

**Let's Build.
Let's Design.
Let's Solve.**

**Spotlight: Geek Out on
CONNECTED LEARNING**
Register online at dml2016.dmlhub.net

Power Brokers: Building Youth Social Capital through Connected Learning, led by **Dixie Ching**, New York University doctoral candidate; DML Hub Research Director **Mimi Ito**; University of Washington's **Philip Bell**; and Stanford's **Brigid Barron**.

The connected learning approach posits that when learning is connected across settings, it is more resilient and likely to lead to educational, civic, and economic opportunity. Research has demonstrated that many young people struggle to connect their interests and informal learning to their school-based learning and opportunities in their communities. This is particularly true for young people whose parents aren't actively brokering these connections, and whose social networks don't include others with high educational and economic attainment. Educators and learning institutions can play a critical role in brokering those connections. This workshop will bring together researchers, educators and designers who are studying, creating, and testing ways of brokering and connecting learning across settings. This will be a working meeting with presentations and small group discussion to hash out key frameworks, design features, and findings. Participants will be invited to submit a paper to be considered for a special issue of the International Journal of Learning and Media.

DETAILS

9:30 – 5:00 | University of California, Irvine
Student Center, Emerald Bay A
Wednesday, October 5, 2016
6 hours | 20 Participant Maximum
Cost: \$100
